Wireless Security System

# SECURITY...

Paradox Security Systems' MG5000 wireless security system provides you with three different levels of security so, if you choose, your home can be armed and protected at all times. Whether you are away from home, fast asleep or home alone, your security system can provide you with the flexible security you need to meet your changing lifestyle. Always protected; the new security solution.

## Away from home:

When you leave your home, maximize your security with a push of a button. Each of up to 32 points of detection, like your front door, windows, balcony and motion detection devices, will immediately alert you in the case of an unrecognized breach. This invisible barrier not only provides you with complete security, but with the peace of mind that your family, your home and your belongings are safe.

## Security while you sleep:

Now your main floor can be completely protected while you sleep in full security upstairs. Your front and back doors, windows, balconies and any other points of detection that you choose can be on full alert while your family is free to roam the upper level of your home without setting off an alarm. When you're ready to come downstairs, remove the arming mode with a touch of a button.

## Home alone:

Give yourself peace of mind knowing that you are safe, even when you are home alone. Whether you're upstairs relaxing in a bath or downstairs playing with the children, you can't always hear what's happening on the main floor. With MG5000 you can secure your perimeter points of detection and keep your living space unarmed.

# MADE SIMPLE.

## Twice the security:

The MG5000 can secure two separate areas with one single system. This means your home can be disarmed while your garage is armed 24hrs a day. Secure your shed, your trailer or an upper apartment unit to double up on your security. Ensure that your pool, your home office, your safe room or your wine cellar can only be accessed by you or someone you choose or that an area automatically arms at the same time every day.

## Check your security status with your remote:

With one-touch, remote control convenience, managing your security system has never been simpler. Disarm your system with one button, arm it with another or send a panic signal to your monitoring station. For those times when you get into your car and just can't remember if you armed your system, simply push the **i** info button on your remote: if the LED light is red, your system is armed, if it's green, your system is disarmed. Your system status can also be communicated by an audible tone.

## Immediate contact in case of alarm:

In the case of an alarm your system will immediately contact your monitoring station, contact you on up to 5 different telephone numbers and a pager number and will also generate a siren to indicate an emergency.

## Wireless security:

With the MG5000 you can provide your home with maximum security without the hassle of tearing holes in your wall, running wires or paying for expensive installations. The convenience of a wireless security system also means your system can always move with you, so you can secure your apartment or condo even if you plan on buying something else later.

## Avoiding false alarms:

Most false alarms result from errors that occur from security system owners using over-complicated keypads. The keypads that accompany your MG5000 system have been designed with this major obstacle in mind, and as a result, provide you with guidance and one-touch button ease of use.

### MG5000 overview:

- Secure up to 32 points of detection
- Control your security system with remote control convenience and one-touch button ease
- Protect two separate areas with one single system
- Immediate alarm notification on up to 5 telephone numbers
- Optional voice reporting module that announces pre-recorded message to indicate type of emergency; option also allows you to arm/disarm system via phone
- A full range of wireless transmitters, including remote controls, motion detectors, door contacts and smoke detectors are available
